Note: a Wild Animal Regulated Fish License is required to legally sell grass carp. All properly licensed dealers are included on a separate "Authorized Grass Carp Suppliers List".

Aquaculture Registration Procedures and Information

All individuals selling fish must be properly licensed or have registered as an aquaculturist. An aquaculture registration allows for the production and sale of domestic fish, as defined in 27-1-2(23). The document entitled "A Summary of Georgia's Licenses and Permits for Aquaculture" should be consulted for a full description of all licensing requirements.

Who is eligible for doing business with an aquaculture registration?

1. Aquaculturists producing and selling or retailers/wholesalers reselling domestic fish.
2. A commercial fish hatchery license, wholesale fish dealers license (DNR) or retail fish dealers license are not needed to sell domestic fish if the seller has registered as an aquaculturist. This includes retailers reselling domestic fish (bait stores, farm and garden stores, etc). Grocery stores do not have to register to sell live domestic fish.
3. At this time, aquaculture registrations are not required for the production and sale of invertebrate organisms such as freshwater prawns (*Machrobrachium* sp.), non-native marine shrimp cultured inland, and crawfish. Voluntary registration is encouraged however.

What is not covered by an aquaculture registration?

1. Sale of game fish (may require commercial fish hatchery license).
2. Sale of fish not considered domestic fish (this would include fish covered under 27-5-5 that may or may not require a Wild Animal License for their possession and/or sale – examples: tilapia, non-native trout or salmon species, grass carp, non-native sturgeon, etc).

What is needed to apply for an aquaculture registration?

1. A fully completed and signed aquaculture registration application (with actual business address) must be submitted.
2. Completion of the "kind of business" section of application. They will generally either be a hatchery/catch-out pond business producing fish or retail/wholesale business not producing the fish they sell (i.e. domestic bait wholesaler or retail store selling domestic bait fish).
3. If a business or individual wants to be on the DNR fish suppliers list they must fill out the separate application listing the species that they produce/sell and wish to advertise. This application is sometimes on the back of the aquaculture registration application and is available separately at www.georgiawildlife.com.

When do registrations expire?

Registrations expire on April 1 following two years of registration (registrations issued up until March 31, 2004 will expire on April 1, 2006. Any registrations issued from April 1, 2004 until March 31, 2005 will expire April 1, 2007...). Registrations renewed in 2004 will expire April 1, 2007 (those renewed in 2005 will expire April 1, 2008...).

Fish Species Covered as Domestic Fish Under Aquaculture Registration

Common Name	Scientific Name	Notes
Channel catfish	<i>Ictalurus punctatus</i>	
Largemouth bass	<i>Micropterus salmoides</i>	
Smallmouth bass	<i>Micropterus dolomieu</i>	
Rainbow trout	<i>Oncorhynchus mykiss</i>	
Brown trout	<i>Salmo trutta</i>	
Brook trout	<i>Salvelinus fontinalis</i>	
Crappie	<i>Pomoxis</i> sp.	Black or white
Bluegill	<i>Lepomis macrochirus</i>	
Redear sunfish	<i>Lepomis microlophus</i>	
Hybrid sunfish	<i>Lepomis</i> sp.	i.e. "Georgia giants"
Hybrid bass	<i>Morone</i> sp.	Striped bass x white bass
Striped bass	<i>Morone saxatilis</i>	
White bass	<i>Morone chrysops</i>	
Golden shiner	<i>Notemigonus crysoleucas</i>	
Fathead minnow	<i>Pimephales promelas</i>	
Koi	<i>Cyprinus carpio</i>	
Common carp	<i>Cyprinus carpio</i>	
Freshwater drum	<i>Aplodinotus grunniens</i>	
Smallmouth buffalo	<i>Ictiobus bubalus</i>	
Red drum	<i>Sciaenops ocellatus</i>	
Gizzard shad	<i>Dorosoma cepedianum</i>	
Threadfin shad	<i>Dorosoma petenense</i>	
Paddlefish	<i>Polyodon spathula</i>	
Yellow perch	<i>Perca flavescens</i>	
Mosquitofish	<i>Gambusia affinis</i>	
Mullet	<i>Mugil cephalus</i>	
Bullhead catfish	<i>Ameiurus</i> sp.	
American eel	<i>Anguilla rostrata</i>	
Walleye	<i>Sander vitreus</i>	
Red fin pickerel	<i>Esox americanus</i>	
Chain pickerel	<i>Esox niger</i>	

This list is not exhaustive and all-inclusive but gives a summary of some commonly cultured species that could be covered under an aquaculture registration.

Information on a variety of fish species may be found at www.fishbase.org.
