

# Space Invaders

are taking over!

Huh?

Space Invaders/“*Invasive Species*” are greedy plants and animals that aren’t native to Georgia. They try to hog all the habitat space and resources that native plants and animals need to live.

**MISSION:** Blow Up these Space Invaders before they gobble the resources

Circle the Space Invaders’ names to eliminate them from this habitat.

- MULTIFLORA ROSE
- CHINESE WISTERIA
- ENGLISH IVY
- MIMOSA
- FERAL HOGS
- MEDITERRANEAN GECKO
- CANADA GEESE
- HOUSE SPARROW
- EMERALD ASH BORER

## Did You Know?

Pet Store turtles, released in the wild, use the space and food that the native animals need.

I won't release a pet in the wild and won't take a wild thing home as a pet.

Native trees can die when insects hitch a ride on a log...

My family will buy or find firewood only in the area where we build a fire.

“Weed seeds” stick on clothes and shoes, waiting to fall off and spread throughout a habitat...

I will stay on marked trails.
