

**Georgia Department of Natural Resources Incident
Action Plan**

Chronic Wasting Disease (CWD) Detected in Georgia

GEORGIA

DEPARTMENT OF NATURAL RESOURCES

Incident Name

Georgia Chronic Wasting Disease (CWD)

Operational Period #

15

Op Period Dates

8-24-25 to 9-6-25

Distributed To

Georgia Department of Natural Resources

(For Internal Use Only)

Incident Summary Statement

On January 15, 2025, the Georgia Department of Natural Resources (DNR) was notified of an initial reactor screening test for a Chronic Wasting Disease (CWD) sample in a hunter-killed free-ranging white-tailed deer harvested on the Berrien-Lanier county line in South-Central Georgia. The sample was then sent to the National Veterinary Services Laboratory (NVSL) for confirmation. DNR received confirmation of positive status on January 22, 2025. On January 23, DNR interviewed the hunter and confirmed the harvest location, and subsequently issued a press release confirming the first case of CWD in Georgia. On January 24, DNR held a press release to answer questions and give further details on the next steps that will be taken. A public meeting was held in the CMA on August 21, 2025. A two-county CWD Management Area (CMA) was established around the positive sample location, as well as a one-mile intensive sampling zone around the positive sample location. Within the one-mile zone, landowners and field staff are cooperating to collect additional biological samples to assess prevalence. Additionally, field operations staff are collecting samples from road-killed deer. On 4/4, DNR recieved notification of initial reactor test on a deer collected near the first positive. NVSL confirmation was recieved 4/18. A total of 30 samples have been collected and tested negative within the CMA, 12 of which inside a 1-mile radius. Thirteen drop-off freezer locations have been identified. Thirty-five processors or taxidermists have been identified as sampling locations. All WRD-GM region and headquarters offices are being established as sampling locations. Field staff are coordinating with crop damage permit holders (16) to collect additional samples until deer season. Required arrangments for sampling during the 2025-26 hunting season are in progress.

Operational Period Objectives

Incident Name Georgia Chronic Wasting Disease (CWD)

Operational Period

15

Operational Period Dates 8-24-25 to 9-6-25

CWD Management Zone Map

Operational Period Objectives

Incident Name	Georgia Chronic Wasting Disease (CWD)
Operational Period	15
Operational Period Dates	8-24-25 to 9-6-25

Objective 1: Continue sampling deer in CMA before hunting season

Objective 2: Establish CWD sampling locations statewide by late summer 2025.

Objective 3. Develop and implement education and outreach materials and meeting opportunities for the public for CWD sampling access and resources.

Objective 4: Complete internal education for front line staff prior to deer season.

Objective 5: Expand CWD testing capacity at the UGA Athens Veterinary Diagnostic Lab.

Objective 6: Expand CWD monitoring through environmental surveillance.

Objective 7: Assess human dimensions of risk factors in the CMA and identify mitigation recommendations.

	Assignment List			
Incident Name	Georgia Chronic Wasting Disease (CWD)			
Operational Period	15			
Operational Period Dates	8-24-25 to 9-6-25			
Operations Section Chief	Kevin Rose			
Branch Director				
Divison/Group Supervisor				
Resoures Assigned				
Resource Identifier	Leader	# of Persons	Contact	Reporting Location
Work Assignments				
	<u>Objective 1</u>			
Alley Philson/contractor	Coordinate with crop damage permit holders to collect samples with priority inside 5-mile radius. Goal of 30 total samples inside 1-mile radius and as many as possible within 5-mile radius.			
	<u>Objective 2</u>			
Alley Philson	Work with local government, municipal, taxidermists and processors to set up freezers where hunters can leave deer heads for testing. Sites must include power, water, and paved surface.			
Alley Philson	Create a plan to monitor sampling sites, transport heads to Grand Bay, and transport samples to lab. Identify seasonal staffing/contractor needs.			
Region Supervisors	Identify Game Management staff responsible for establishing additional sampling locations within each region.			
Greg Nelms/Drew Zellner	Continue to establish sample processing station at Grand Bay WMA check station by installing incinerator, canopy cover for incinerator, identify or create covered and paved work area, order 4			
	<u>Objective 3</u>			
Charlie Killmaster	Finalize webinar for taxidermists and processors statewide for Tuesday, August 26, 2025 at 7pm			
	<u>Objective 4</u>			
Charlie Killmaster	Schedule virtual biologist CWD training			
	<u>Objective 5</u>			
Charlie Killmaster	Update contract with UGA-AVDL to purchase additional lab equipment for ELISA and RT-QuIC and increase tech staff.			
Charlie Killmaster/ Rebecca Kresin	Continue working with VetView to create database API to automate CWD test notification system.			
Charlie Killmaster	Explore opportunities with Tifton AVDL to purchase ELISA equipment for 2026-27 season.			
	<u>Objective 6</u>			
Charlie Killmaster/ Alley Philson	Continue to conduct environmental surveillance on deer facilities inside CMA.			
	<u>Objective 7</u>			
Charlie Killmaster/ Matt Goode	Continue coordination with UGA to implement research project			
Charlie Killmaster/ Kaitlin Goode	Develop and implement educational campaign on CWD risk factors and management.

Incident Accomplishments

Field Response

The Operations team has been contacting landowners within a 1-mile radius of the positive sample site to inform them of the CWD positive sample, and to work with them to gain additional samples to determine CWD prevalence via landowner permit. Field staff have also collected samples from processor and taxidermists, road-killed deer, and sick deer within the CMA.

Table 1. Summary of CWD related field response by DNR Staff since start of incident

Contact Type	Totals
Deer Depredation Permit Holders Contacted	16
Landowner Permits Issued	8
Total Samples Collected in CMA	31
Samples collected in 1-mile radius	13

Table 2. Summary of samples collected by sample type and location within the CMA.

Samples collected in CMA							
Harvest Date	Sample Number	County	Inside 1 mile radius	Sex	Age	Sample Type (roadkill, hunter harvest, processor, etc.)	Results

K&K Deer Processing	6749 Good Hope Rd	Naylor	Lowndes
Bullard Deer Processing	6980 Val Del Road	Adel	Cook
Anchor Outdoors	607 West Central Ave	Lenox	Cook

Completed Actions

Sampling contractor hired for collecting samples from crop permit holders.

Freezers, supplies, and decals for sampling sites recieved.

Statewide deer carcass disposal rule implemented.

Contracted with UGA to develop a research project to assess CWD risk factors before and after educational campaign.

Secured necessary funds to implement FY26 to fund disease management and monitoring.

Completed and distributed fawn rehabber guidance on handling fawns from CMA.

Scheduled in person (Aug 21) and virtual (Aug 26) meetings for taxidermists and processors.

Scheduled in person public meeting in CMA for Aug 21.

Scheduled virtual meeting for DNR staff for Aug 14.

Statewide CWD sampling progress dashboard for public created.

Developed talking points for Game Wardens and WRD staff.

Created online dashboard for public to look up CWD test results.

Deer Program staff attended Region LED meetings for CWD Q&A.

Created online interactive map of sampling locations for website

Created CWD website/QR code business cards and distribute to front line staff

Created informational handouts for taxidermists and processors.

Created informational placards for hunters that businesses can post.

In person public meeting for taxidermists and processors in and around CMA held on Aug 21.

In person meeting for general public in and around CMA held Aug 21

CMA Sampling Sites Schedule

Monday - Collect heads from freezers/taxidermists/processors and thaw

Tuesday - Pull samples, incinerate heads

Wednesday - Transport samples to UGA for testing
